There is a shareware program WriteLog!, written by Wayne, W5XD.
It supports multiple rigs, (only one at a time), a number of popular
contests, keys the rig for CW (I think), and runs a DVK. I beleive it
also slices and dices. You probably can find a copy on oak.oakland.edu
or one of the simtel mirrors. I used it for a naqp and found to be fine.
There were some nice features. About the only thing I didn't like was the

log printing, but that really was more a personal taste issue. I think it could interface with a TNC so you can run single op assisted, but I did not check that out. I says it can be used with RTTY, but it certainly can not compete with WF1B in that mode.
